

Project Engineer

McDonald York, a Commercial General Contractor located in Raleigh, NC, is looking for an energetic, self-motivated individual to join the Operations team as a Project Engineer. This position is responsible for completing assigned projects within a schedule and budget while achieving the goal of delivering a final product that meets or exceeds the client's expectations. A qualified candidate will have excellent communication and interpersonal skills. This position requires the ability to maintain a strong sense of focus and confidence under tight deadlines and varying workloads. Excellent organizational skills, attention to detail and the ability to set and manage priorities are also requirements.

Specific responsibilities to include, but not limited to:

- Assist Project Manager to achieve specific project goals
- Prepare and update project schedules and budgets
- Gather data, compile information and prepare reports
- Review plans and specifications to minimize conflicts
- Project turnover/closeout
- Ensure RFI's and Submittals are submitted and tracked
- Financial management of projects

Qualifications include a Bachelor's degree in Civil, Mechanical or Electrical Engineering or Construction Management.

McDonald York Building Company provides a complete and competitive benefit package. McDonald York Building Company is an Equal Opportunity Employer.
